DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-30, drawn to optical disc, classified in class 428, subclass 64.1.
 - II. Claims 31-38, drawn to method of making optical disc, classified in class 156, subclass 500.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, an optical disc can be made by sputtering a substrate under an atmosphere of argon containing not more than 15% of nitrogen or under an atmosphere containing not more than 15% of oxygen and subsequently forming and layering the various reflective, dielectric, recording and protective layers.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Michael Stein on August 20, 2001, to request an oral election to the above restriction requirement, but did not result in an election being made.
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently name inventors is no longer an inventor of at least one claim

Art Unit: 1774

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
